Workshops | OpenInfra Days | PostgreSQL | Cloud Native | PlanetNix | Kwaai Summit | SunSecCon | BoFs

THURSDAY

Time	Ballroom A	Ballroom B	Ballroom F	Ballroom G	Room 101	Room 104	Room 105	Room 106	Room 107	Room 208	Room 209	Room 211	Room 212
08:00													
08:30													
09:00					PlanetNix Opening Ceremony			**Allison Price, Gerald Bothello, Luke Repko, Chris Breu, Julia Kreger, James Blair, Ildiko Vancsa** OpenInfra Days North America Keynotes					
09:30					**Ron Efroni, Kelsey Hightower** Fireside Chat: An Outsider's Look at								
10:00	**Joe Thompson** Kubernetes For Sysadmins Workshop	**Ryan Jarvinen, Evan Shortiss, Christian Hernandez** Progressive Delivery with Argo Rollouts		**Magnus Hagander** A look at the Elephant's trunk - PostgreSQL 18	**Tristan Ross** The Nix PR Pipeline	**Farid Zakaria** Learn Nix the Fun Way	**Marco Palacios** SunSecCon Workshop: Cooking Cyber Recipes with CyberChef			**Aleksey Tsalolikhin** Power Editing with vi	**Steve Oualline** Embedded Programming Workshop Day 1	**Cynthia Lo, Avni Khatri, Margaret Tucker** Open Source for Good	**Sam Johnston** pAI-OS Workshop
10:30						Speed Dating		Coffee Break Sponsored by Pure Storage, Inc.					
11:00				**Christophe Pettus** Language is a Virus: Locales and PostgreSQL	**Aneesh Agrawal** Docker Was Too Slow, So We Replaced It Nix in	**Kenji Berthold, Lassulus .** generating secrets with sops, the		**Kendall Nelson, Stephen Walli, Corey Leong** Students in Open	**Amy Marrich** Getting Started With OpenStack				
11:30					**Nick Johnstone** How to make Nix five times faster	**Tim Golden** Building Linux from Scratch... from Nix		**Jay Faulkner** OpenStack in the Real World	**Georg Link** Building and Supporting Open Source				
12:00			**Matthew Small,** Rose Proposal					**Jamie Parker** Knowing is Half the Battle: End to End Observability in	**James Blair** Project Gating with Zuul				
12:30			**Nolan Bushnell** AI in Education: Amplified Intelligence through	**Peter Farkas** Bringing MongoDB workloads back to open source by using FerretDB to store data on PostgreSQL				**Michal Nasiadka, Bartosz Bezak** Ironic, Neutron and OVN - current	**olaph wagoner** Testing software defined storage on multiple				
13:00			**Bruce Schneier** Trust in AI - Beware				**Sandra Stibbards, Lee McWhorter** SunSecCon Workshop: OSINT for Cybersecurity and Hackers						
			Fay Arjomandi The 5th Element:										
			Doc Searls Personal vs										
13:30					**Ross Turk** Nix in the Wild	**Daniel Baker** Introduction to the Module System							
14:00	**Paul Yu** So you want to be a Kubestronaut	**Leigh Capili, Tanja Ulianova, Nick Lewis** Developing as a Team for Kubernetes with Nix and Flox	**Doc Searls, Fay Arjomandi, Reza Rassool, Nolan Bushnell**		**Thomas Bereknyei** Using /opt/store					**Carl George, Shaun McCance, Jason Brooks** Fedora+CentOS Classroom		**Jonathan Haslam, Jordan Rome, Daniel Xu** bpftrace hands on lab	
14:30			**Liam Broza** Companies	**Devrim Gunduz** Extend your PostgreSQL: The world of PostgreSQL extensions				**Goutham Pacha Ravi, Carlos Eduardo da Silva,** Ashley Rodriguez	**Maciej Lecki** RDO openstack on OKD kubernetes: The perfect				
			Greg Spektor Kwai/Personal AI										
15:00			**Jon Conners** pAI Hackathon for		**Adis Bladis** Charming wild snakes with nvpublished nix 0	**Jacek Galowicz** Mastering NixOS Integration Tests: Advanced Techniques for Fast and Robust Multi-VM Tests		**Todd Robinson** Scaling AI with Open Source: Running Models on	**Ildiko Vancsa** Kata Containers - Security and Containers Without				
			Panel: Personal AI Technology										
15:30			**Diego Galeano** Crisis/AI Co-		**Yannik Sander** Nix is faster than no evaluation			**Sagy Volkov** Sponsor Talk:	**Patrick BEAUCAMP** Kata Container & LLM				
			Making AI Faster with Slide Space	**Hamid Akhtar** Keeping Your PostgreSQL Replication Healthy: Resolving Conflicts for Optimal Performance				**Simon Dodsley** Sponsor Talk: Pure					
16:00			**Brian Ragazzi** Technical Learnings				**Lenin Alevski** SunSecCon Workshop: Kubernetes Security - Hands-On Attack and Defense						
			Panel: AI Research Initiatives										
16:30			**Ethical Learnings of** Building Distributed		PlanetNix Lightning Talks			**Tom Yin, Vivekanandan Muthukrishnan,** Andy Mangosian	**Ken Crandall** Sponsor Talk: The Economics of Migrating from				
17:00			**Sam Johnston** Open Source	**Mark Wong, Stacey Haysler, Devrim Gunduz, Jimmy Angelakos, Magnus Hagander, Christophe Pettus** PostgreSQL Ask Me Anything				**Nathaniel Moore** Cloud Repatriation - Industry Trends to Hybrid	**Kenneth Tan** Preparing VMware Systems for OpenStack				
			Governing AI for Autonomous										
17:30			**Panel: AI Policy**					**Yuya Kuno, Toshiaki Takahashi,** Yasufumi Ogawa	**Tony Breeds** Moving authentication from a single provider to				
			Reza Rassool Closing Remarks										
18:00	Birds of a Feather Discussions	Birds of a Feather Discussions

UpSCALE | SunSecCon | BoFs

FRIDAY

Time	Ballroom A	Ballroom B	Ballroom C	Ballroom DE	Ballroom F	Ballroom G	Ballroom H	Room 101	Room 103	Room 104	Room 105	Room 106	Room 209	Room 211	Room 212	Exhibit Hall
08:00																
08:30																
09:00								PlanetNix Opening			SunSecCon Welcome Anthony Scheller SunSecCon Keynote: From IC to Manager...and Then Doing It Again	James Blair Managing Test Resources and Images with Zuul			Federico Lucifredi, JC Lopez, Gregory Farnum Ceph Storage: a Caffeinated Primer	
09:30								Michael Stahnke Flox as a Guided Path for Nix	Aaron Prisk, Jason Nucciarone UbuCon Introduction	Workshop - Intro to Nix		Chris Morgan The future of OpenStack operators meetup				
10:00	Tim Banks The Cloud Has Made Us Reckless	Lori Lorusso, Katherine Druckman A Hitchhikers Guide to the CNCF Landscape	Federico Gonzalez-Waite Lessons learnt from Open-Source Implementation in the Mexican Government	Kathryn "Casey" Bouskill What's an Anthropologist doing in Meta's Infrastructure?	Matt Ingenthron LLMs with Your Data in Your Applications	Henrietta Dombrovskaya Take your pgBadger usage to the next level!	Alkin Tezuysal Boosting MySQL with Vector Search: Introducing the MyVector Plugin	Morgan Jones Adventures in Mesh Networking at DEF CON with NixOS	Ken VanDine Simplify Your Data Science Workflow on Ubuntu with Canonical's Data Science Stack		Roy Talyosef Adversarial Intelligence: Redefining Application Security through the eyes of	Pooja Ghumre, Robby Stahl Seamless migration from VMware to	Steve Oualline Embedded Programming Workshop Day 2	Alexandre Renchon Standing on Code: Advancing Scientific Discovery Through Sustainable Software Practices		
10:30								Mike Kelly Building a Chromebook replacement with NixOS				DJ MIN Sponsor Talk: How to Simplify and Accelerate VMware Migrations				
11:00				Heather Osborn Turning Incidents into Insights, Not Insults				Ron Efroni A Sustainable Nix: State of the Union	Miona Aleksic Build your own microcloud		Keyur Rajyaguru AI Agents in a Semi-Autonomous Security Operations Center (SOC)				Michal Nasiadka Kolla User Forum	
11:30	Gene Liverman Going All-in on Gateway API - Replacing Ingresses and Enhancing a Service Mesh	Josh Berkus Develop, Test, and Deploy with Podman Desktop	Simon Strohmenger Digital Citizen Participation - Success Factors and Challenges		Masahji Stewart Next-Generation Prompt Engineering: Building Scalable, Cost-Efficient AI Applications for Multi-Model and	Shaun Thomas What's our Vector, Victor?	Carmen Mason, Allan Mason CattleSpa: automated healing of your cloud infrastructure	Rickard Nilsson Remote Nix Builds		Matteo Fusi Python on Nix? Yes, it is possible!				Erik Wessel The Open Source Universe of Numerical Relativity		
12:00				DevOpsDay LA Open Spaces												
12:30	Jussi Nummelin Kubernetes and the Dragons in Linux Kernel vs. Userspace Tools	Shirley Wang Getting started with OpenTelemetry	Stephanie Lieggi, Tim Dennis Building a Network of Open Source Program Offices at the University of California		james healy Harnessing Open Source Solutions in the Generative AI Landscape	Gulcin YildirimJelinek, Andrew Farries Anatomy of Table-Level Locks in PostgreSQL	Scott Stroz Hidden Gems in MySQL Shell							Travis Hughes How DIY Robotics Can Help With Environmental Science		
13:00									Noah Chelliah Live Ask Noah Show		Saurabh Sharma Automated secure mobile code reviews using Danger				Amy Marrich, Julia Kreger, Jonathan Bryce, Mark Collier OpenInfra Leadership Meet and Greet	
13:30				Sara Huddleston DevFocus Fireside Chat Justin Reock Platform Engineering				Victor Fuentes Tvix store in production		Connor Baker Evaluating the Nix Evaluator: Why Nix Performance		Dave Stokes VALKEY 101 - A Superfast in-memory database				
14:00				Ben Rockwood How did it come to this? Untangling SA, Dev(*)Ops, SRE, and PE				Eelco Dolstra Configurable Flakes	Alastair Flynn Automatically orchestrate your application with Juju	John Ericson Sandstone: Fast incremental Haskell builds using	Andrew Amaro Data Breaches and Dark Secrets: The Corporate Side	Sukesh Behera, Jimmy McCrory Cloud Rebalance			Carlos Eduardo da Silva, Goutham Pacha Ravi, Ashley Rodriguez From Zero to Code: A Hands-On Guide to Making Your First OpenStack Code Contribution	Exhibit Hall
14:30	Adriana Villela, Reese Lee When Things Go Sideways: Troubleshooting the OTel Operator	Murriel Perez McCabe, Elizabeth Ponce Bringing joy to Kubernetes Deployments	Monica Waggoner How LA Metro is using Open Data to prepare for the 2028 Olympics and Paralympics		Nithish Raghunandanan Evaluating the Effectiveness of Retrieval Augmented Generation (RAG) in Root Wizard	Nick Meyer 9.2 to 15 and beyond	Syed Usman Ahmad Leveling up your MySQL Skills	PlanetNix Unconference				Jimmy McArthur, Ken Crandall, DJ MIN From VMware to OpenStack: Redefining the		Ryan Tam AI, Cloud Computing, and Software Engineering Concepts in Seismology		
15:00				Annie Hedgpeth Firewalls and Friendships: Building a Relaxed					Jason Nucciarone Charmed HPC on OpenStack Sunbeam		Kennedy Toomey Exposed Detection Rules: What's Next for Defenders?		Julian Pistorius Sponsor Talk:			
15:30	Paul Yu JWT it like its hot!!	Kyle Quest Many Ways of Building Containers: From Manual to Transparently Built On-Demand Containers.	Guillaume Saunier Technopolitics: Public Digital Infrastructure for Democracy with Decidim	Rob Fletcher Strengthening	Steve Pousty Computer Vision in Your Pocket: Exploring Phone Photos with Embeddings	Jimmy Angelakos Row-Level Security sucks. Can we make it usable?	Igor Donchovski Lessons learned when managing MySQL in the cloud					Francisco Araya OpenStack as a Catalyst for Innovation		Nikki-Rae Alkema, David vonThenen Training Multi-Modal ML Classification Models for Real-Time Detection of Deepfakes	Martial Michel OpenStack Scientific SIG Meeting	
16:00				kat gaines Mastering Incident Communication					Ken VanDine, Rajan Patel Entra ID authentication on Ubuntu Desktop at scale with Landscape		Max vonBlankenburg How To Write A Vulnerability Disclosure	Armstrong Foundjem Leveraging OpenInfra and			Julia Kreger Forum - Ironic - Something Something Cloud	
16:30								Closing Ceremony								
17:00	Amber Salome, Eamon Ryan To accrue additional technical debt, turn to page 52! A choose-your-own-adventure system design and debate	Adriana Villela, Ana Margarita Medina Infrastructure as Code 3 Ways	Chach Sikes, Nina Kin, Esther Sportello Panel: Public tech stacks that work for all	Scott Bly Adding API Security to your DevSecOps Toolbelt	Nuri Halperin Is Vector Search Right for Me?	Colin Charles Understanding PostgreSQL for the MySQL Developer and DBA	Mikaël Francoeur How Not to Go Bankrupt (and Look Foolish): Mastering Transactions in MySQL		Nathan Haines, Richard Gaskin Ubuntu Q&A and Closing Remarks		Andy Giron That One Time the Threat Actor Sent Me His Token	Allison Price, Armstrong Foundjem, Todd Robinson, Kevin Carter Unleashing AI with		Julia Sloan CliMA: A New Open Source Code for Climate Modeling		
17:30												Closing Remarks				
18:00	Birds of a Feather Discussions	Birds of a Feather Discussions

SATURDAY

Time	Ballroom A	Ballroom B	Ballroom C	Ballroom DE	Ballroom F	Ballroom G	Ballroom H	Room 101	Room 103	Room 104	Room 105	Room 106	Room 107	Room 211	Exhibit Hall
08:00															
08:30															
09:00															
09:30															
10:00				**Solomon Hykes** Robots building Robots											Exhibit Hall
10:30															
11:00															
11:30	**Leigh Capili, Tom Berekmyei** Rethinking the Container Layer with Nix	**Justin Marquis, Christian Hernandez** GitOps best practices using Argo CD	**Jordan Rome** Evolving a DSL: How bpftrace makes language design decisions		**Sinan Kefeli** Enhancing Occupational Classification and Seniority Prediction from Job Descriptions Using	**Jared Bernard** How to do Everything in a Terminal	**Hazel Weakly** Source Available is Thriving but Open Source is Dying	**Georg Link** Shining Light on the Open Source Supply Chain: The Risk in Community Health	**August Cho** Making Linux From Scratch	The Next Generation Workshop Space	**Matthew Sanabria** Baking a TuringPi in the Home Lab	**Anita Zhang** Gotchas of Everyday Systemd	**Peter Boros** Observability at Tigris Data	**Alexander Krizhanovsky** Scalable and Low Latency Lock-free Data Structures	
12:00									**Andrew Lim** Smarter Ways to Stay Safe Online by						
12:30	**Jonathan Perry** Better latency with fewer servers: avoiding RAM noisy neighbors	**Scott Williams** Scalable Open Source Data Science on Bare Metal Kubernetes	**Jake Hillion, Daniel Hodges** Writing Production Ready Schedulers using Sched Ext		**Bronwen Aker** Keeping Things Local - Making Your Own Private LLM	**benny Vasquez** Choose your benefactor: Common Good or Corporate Good	**Ron Efroni, Michael Stahnke, Kelsey Hightower, Katherine Druckman** Taming the Chaos: What's Next in	**Divya KK, Srirama Sharma** Managing Infrastructure for Confidential AI using OpenStack			**Joyce Lin** Are we really making the most of our smart home technology?	**Patrick Shuff** Advanced SRE: Networking	**Eduardo Silva** Profiling and beyond: scaling observability with Fluent Bit and eBPF	**Addison Hart** APIs for the Modern World	
13:00									**Jonah Ibarra, Eisly Morales** Scam-Spotting						
13:30															
14:00															
14:30	**Noel Miller, Kyle Gospodnetich** Universal Blue: Delivering Experiences Using Bootable Containers	**Ram Ellupuru, Boaz Ardel** Meshing Your Way to Better Observability	**Quentin Deslandes** A simpler and faster firewall with bpfilter		**Bassam Chahine** AI-Powered Searches with Cassandra	**Tarus Balog** MapLibre: An Introduction to Its Use and Its Community	**maddog Hall** The JOY of Free Software: It should be fun to fish	**Katherine Druckman** Navigating Security in Generative AI Development	**Brady Hancock** Be Your Own AWS		**Jon Cruz** What the Heck is KiCad, and Can I Really Make My Own Electronics?	**Kevin Mittman** 99 package problems	**Jason Hand** Modernizing Systems Observability with AI and LLMs	**Gabriele Bozzola** The Research Software Engineering Revolution	
15:00									**Alexander Moral** Building Community and Social Capital on the Internet						
15:30															
16:00	**Divine Odazie** Cloud Native Technologies: The Building Blocks of Modern Database Software	**Fabrizio Sgura** Breaking Free from Legacy Virtualization: Embracing KubeVirt for Cloud-Native Workloads	**Maya Singh, Jose Blanquicet** Kernel observability using eBPF made easy and approachable with Inspektor Gadget		**Thomas Charlon** The best of both worlds: building R / Python pipelines for biomedical LLM semantic search apps	**Margaret Tucker** The Nuances and Challenges of Moderating a Code Collaboration Platform	**Jeremy Adams, Rebecca Dittmar** When Pipelines Are Code, Developers Win	**Alexander Rubin** Atomic Honeypot: A MySQL Honeypot That Drops Shells	**Alana Wu** Euphony Echo: Integrating Virtual Reality, Machine Learning, and		**Alex Kretzschmar** Access self-hosted services securely from anywhere	**Ildiko Vancsa** Kubernetes as a Geographically Distributed System	**Vijay Samuel, Jing Hu** Exemplars - A Tale of Pillars Supporting The Observability Structure	**Emily Le** The Future is Real-Time Data	
16:30															
17:00	**Avi Press** What information are package & container registries hiding from you?	**Bryan Honof** Using Nix to build pretty small images	**Angelina Vu** Linux Virtualization Based Security (LVBS)		**Xe iaso** Affording your AI chatbot friends	**Jeremy Meiss** Confessions of an ADHD-fueled technologi... SQUIRREL!!!	**Tyler Menezes, Kendall Nelson, Emily Lovell, Kevin Wang** Mentorship as an Onramp to Open Source	**Jimmy Zelinskie** SpiceDB: Authorization that Scales			**Kyle Gospodnetich, Noel Miller** Bazzite: Building the Future of Linux Gaming Together	**Shaun Hopper, Chandan Avdhut** Evolving AI Research Infrastructure with Kubernetes at Meta: Overcoming	**Hazel Weakly** Redefining Observability: Observability 3.0	**Tanja Ulianova, Nick Lewis** Unpacking Git	
17:30															
18:00															
18:30	**Jayme Bird, Manish Gill** Dancing with the Pods: Live migration of a database fleet while serving millions of	**Joe Allen** Scaling Your Kubernetes Clusters Without Going Broke	**Mohamed Elsakhawy** A deep dive into Linux Networking		**David vonThenen** Demystifying Building Natural Language Processing ML Models and How to Leverage Them By	**Mark Hinkle** Crash Course in Open Source Generative AI	**Paul Mekhedjian** Solving Engineering Problems Using Multi GPU Computing	**Murat Aydemir** Securing Web Applications Against OWASP Top 10 Threats in AWS Cloud			**Sam Hanna** Port Forwarding Risks When Self Hosting	**Mandi Walls** Managing Vendor Incidents	**Dave McAllister** Know your data: The stats behind your alerts	**Autumn Nash** Barbie's Journey: A CI/CD Tale of Transformation	
19:00															
19:30	Birds of a Feather Discussions	Birds of a Feather Discussions

SUNDAY

Time	Ballroom A	Ballroom B	Ballroom C	Ballroom DE	Ballroom F	Ballroom G	Ballroom H	Room 101	Room 103	Room 104	Room 105	Room 106	Room 107	Room 209	Room 211	Exhibit Hall
08:00																
08:30																
09:00																
09:30														Erik Mondrian A Hands-On Introduction to Blender + Python		
10:00									Mary Kypreos Candidate Experience Done Right: Practical Strategies for Open Source Hiring Teams	Jenson Crawford Workshop: Improve your resume and interview skills by experiencing the interviewers perspective						Exhibit Hall
10:30				Denver Gingerich What happens when hardware puts software freedom first? We built a router to find out												
11:00									Amy Marrich Why You Should Join a Community					Tom Lechner How to make video game vegetation sway		
11:30	Daniil Fedotov Kanister.io: Application Consistent Backups on Kubernetes	Ryan Jarvinen Prepare to Perform with Backstage Software Templates	Sriram Nambakam Towards improving code integrity on Linux		Zubair Talib Open Source for Real-Time Voice Understanding: An Edge AI Solution	Bradley Kuhn Copyleft and the GPL: Finding the Path Forward to Defend our Software Right to Repair	Atom Ramirez, Marie Ramirez An Introduction to Post-Quantum Cryptography for Linux System Administrators	Vincent Sloan Online Payments: Attack and Defense			Adrian Todorov, Kerim Satirli Controlling Robots like NASA	Xpaul Vigil, Isaac Smothers Deploying AI/ML Pipelines at Crexi	Alok Ranjan, Paul Shen Scaling Observability with Loki at Dropbox		Adam Christian Reimagined Engineering Docs with Runme.dev	
12:00									Krista Burdine Make Your Open Source Story Work for You							
12:30																
13:00									Adrianna Frick Using Certification to Prove Home Lab Skills	Jenson Crawford Career Workshop: Interviews and Negotiations in Open Source						
13:30	Colin Charles CloudOps for your databases: a new paradigm for managing your data stores	Vahan Melikyan From Pull Request to Live Environment: Automating Ephemeral Environments	Mitchell Levy Bringing Per-CPU Variables to Rust-for-Linux		Gene Chuang Everything I Need to Know About LLM, I Learned From A Pasadena Search Company 24 Years Ago	James Huang RamaLama making AI Boring	Carl Richell Meet COSMIC DE	Kennedy Toomey Defense in Depth, as learned from watching football			Kyle Rankin Nextcloud as A Self-Hosted Cross-Platform Cloud	Josh Thornton Beyond Replication: A Holistic Approach to Application Scaling	Jash Mistry, Gabriela Medvetska Beyond Sequential: A Recipe for Async Pipeline Observability and	Mica Semrick darktable: the fundamentals, advanced techniques, and discussion	Tim Quinlan Cloud Development Environments Are Strategic Assets	
14:00									Vinit Dhatrak How to crack software engineering interviews at FAANG and beyond							
14:30																
15:00				Leslie Lamport Closing Keynote with Leslie Lamport												
15:30																
16:00																
16:30																
17:00																
17:30																
18:00																
18:30																
19:00
